A crisis of global governance and leadership

› The global financial crisis has forced a profound rethink of the optimal form of capitalism and the relationship between business and government

› The current crisis has exposed systemic failures of corporate governance in administering the purpose of the firm

› It has shown the failure of global governance to match the new dynamics and consequences of globalisation

› Governments are re-examining corporate accountability to society and how companies earn their license to operate

› Companies are re-examining their code of conduct and leadership values
New leadership skills required

- 76% of senior executives say that it is important they have the knowledge and skills to respond to trends like the low carbon economy, resource scarcity and doing business in emerging markets.
